Hawaii	July 2017	Pill, Patch, Ring	Unrestricted Category-Specific*	ACPE-accredited related to pharmacist's prescribing contraception every 2 years	None	None

ACPE: Accreditation Council for Pharmacy Education

Types of Prescribing authority being utilized in various states<sup>1</sup>:

**\*Unrestricted category-specific:** allows pharmacist's to autonomously prescribe within a specified category of medications and for a medical purpose (often to benefit public health). This is done without entering into a collaborative agreement with a supervising physician.

**\*\*State-wide protocol:** allows pharmacist's to autonomously prescribe when they follow and meet qualifying criteria set out in a protocol published by an empowered state body. When pharmacist's follow the state protocol a collaborative agreement with a supervising physician is not needed.
